DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-21,23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admission (see unnamed reference provided in the IDS filed 9-17-03).

Applicant's admission discloses a device which dispenses pressurized sealant comprising body 12 with associated locking tabs 20 (in as much as Examiner can ascertain from the drawings it appears that the body is *one-piece*) and a locking sleeve 14, but does not disclose the body and locking sleeve as being comprised of plastic. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the body and locking sleeve of plastic, since it has been held to be within the general skill of a worker in the art to select a

known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

In regard to claims 23 and 24, the method as claimed would be inherent during the normal use and operation of the device.

Conclusion

Claims 1-10 and 27-33 are allowed.
